**ISOCYANATE A-2732**

**MATERIAL SAFETY DATA SHEET**

**SECTION 1: PRODUCT AND COMPANY IDENTIFICATION**

**MANUFACTURER**
GENYK Inc.
1701, 3rd Avenue, Shawinigan, QC, G9T2W6
Phone: 819-729-0395 / Fax: 819-729-0383

**PRODUCT**
Trade Name: ISOCYANATE A-2732
Chemical Name: Polymeric isocyanate
Chemical family: Isocyanate
Use: Component of a polyurethane system

Emergency Telephone number: CHEMTREC 800-424-9300 / CANUTEC 613-996-6666

**SECTION 2: HAZARDS IDENTIFICATION**

**PICTOGRAM**

- This Material is classified as hazardous under OSHA Hazard Communication Standard (29 CFR 1910.1200)
  - ACUTE TOXICITY: INHALATION – Category 4
  - SKIN CORROSION / IRRITATION – Category 2
  - SERIOUS EYE DAMAGE / EYE IRRITATION – Category 1
  - SKIN SENSITIZATION – Category 1
  - SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) – Category 3

**Potential Health Effects**
Harmful if inhaled. May cause an allergic skin reaction. Isocyanates may react with skin protein and moisture to cause itching, reddening, swelling, scaling or blistering. May cause allergic respiratory reaction. May cause respiratory tract irritation. May cause lung damage.

**Carcinogenicity**
Suspected of causing cancer.

**Potential environmental effects**
Not expected to be harmful to aquatic organisms.

**SECTION 3: COMPOSITION AND INFORMATION ON INGREDIENTS**

<table>
<thead>
<tr>
<th>INGREDIENTS</th>
<th>CAS #</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diphenylmethane 4,4’-diisocyanate</td>
<td>101-68-8</td>
<td>30-60</td>
</tr>
<tr>
<td>Polymethylene polyphenyl isocyanate</td>
<td>9016-87-9</td>
<td>60-100</td>
</tr>
</tbody>
</table>

**SECTION 4: FIRST-AID MEASURES**

**If in eyes**
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists.

**If on skin**
Remove and isolate contaminated clothing and shoes. For minor skin contact, avoid spreading material on unaffected skin. Wash with plenty of soap and water. Get medical attention if irritation develops and persists. Wash clothing separately before reuse.

**If inhaled**
Remove victim to fresh air and keep at rest in a position comfortable for breathing. If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Do not use mouth-to-mouth method if victim inhaled the substance.
### SECTION 5: FIRE-FIGHTING MEASURES

<table>
<thead>
<tr>
<th>Property</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flash Point</td>
<td>Closed cup: &gt;150°C (&gt;302°F)</td>
</tr>
<tr>
<td></td>
<td>Open cup: 230°C (446°F)</td>
</tr>
<tr>
<td>Suitable Extinguishing Media</td>
<td>Foam. Dry chemical powder. Carbon dioxide (CO2). Water spray may be used if no other available and then in copious quantities. Reaction between water and hot isocyanate may be vigorous.</td>
</tr>
<tr>
<td>Hazards during fire-fighting</td>
<td>Combustion products may include: carbon monoxide, carbon dioxide, nitrogen oxides, hydrocarbons and HCN.</td>
</tr>
<tr>
<td>Protective equipment for fire-fighting</td>
<td>Firefighters should be equipped with self-contained breathing apparatus.</td>
</tr>
</tbody>
</table>

### SECTION 6: ACCIDENTAL RELEASE MEASURES

<table>
<thead>
<tr>
<th>Precaution</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Personal Precautions</td>
<td>Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. For personal protection, see section 8 of the MSDS</td>
</tr>
<tr>
<td>Environmental Precautions</td>
<td>Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).</td>
</tr>
<tr>
<td>Clean-up</td>
<td>If the product is in its solid form: Spilled MDI flakes should be picked up carefully. The area should be vacuum cleaned to remove remaining dust particles completely. If the product is in its liquid form: Absorb spillages onto sand, earth or any suitable adsorbent material. Leave to react for at least 30 minutes. Shovel into open-top drums for further decontamination. Wash the spillage area with water. Test atmosphere for MDI vapour. Neutralise small spillages with decontaminant. Remove and dispose of residues. The compositions of liquid decontaminants are given in Section 16. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.</td>
</tr>
</tbody>
</table>

### SECTION 7: HANDLING AND STORAGE

<table>
<thead>
<tr>
<th>Property</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Storage Temperature</td>
<td>Store in closed original container at temperatures between 10°C (50°F) and 30°C (86°F). Store away from incompatible materials (see Section 10 of the MSDS).</td>
</tr>
<tr>
<td>Handling</td>
<td>Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems or asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Avoid exposure – obtain special instruction before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when no in use. Empty containers retain product residue and can be hazardous.</td>
</tr>
<tr>
<td>Safety Precautions in Storage</td>
<td>Store in accordance with local regulations. Keep container tightly closed in a cool, sell-ventilated place. Keep away from moisture. Due to reaction with water producing CO2-gas, a hazardous build-up of pressure could result if contaminated containers are re-sealed. Do not reseal contaminated containers. Uncontaminated</td>
</tr>
</tbody>
</table>

Note: OELs=Occupational Exposure Limits

INDIVIDUAL PROTECTION EQUIPMENT

Respiratory Protection
Use a positive-pressure air-supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection.

Eye Protection
Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

Skin Protection
Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: Overall (preferably heavy cotton) or Tyvek-Pro Tech ‘C’, Tyvek-Pro ‘F’ disposable coverall. Use chemical resistant gloves classified under Standard EN374: protective gloves against chemicals and microorganisms. Examples of glove materials that might provide suitable protection include: Butyl rubber, Chlorinated polyethylene, Polyethylene, Ethyl vinyl alcohol copolymers laminated (“EVAL”), Polychloroprene (Neoprene*), Nitrile/butadiene rubber (“nitrile” or “NBR”), Polyvinyl chloride (“PVC” or “vinyl”), Fluoroelastomer (Viton*). When prolonged or frequently repeated contact may occur, a glove with protection class of 5 or higher (breakthrough time greater then 240 minutes according to EN374) is recommended. Contaminated gloves should be decontaminated and disposed of.

General Safety and Hygiene Measures
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

### SECTION 10: STABILITY AND REACTIVITY

**Chemical Stability**

Stable under normal conditions.

**Reactivity**

Reaction with water (moisture) produces CO₂-gas. Exothermic reaction with materials containing active hydrogen groups. The reaction becomes progressively more vigorous and can be violent at higher temperatures if the miscibility of the reaction partners is good or is supported by stirring or by the presence of solvents. MDI is insoluble with, and heavier than water and sinks to the bottom but reacts slowly at the interface. A solid water-insoluble layer of polyurea is formed at the interface by liberating carbon dioxide gas.

**Conditions to avoid**

Avoid high temperatures.

**Substances to avoid**

Water, alcohols, amines, bases and acids.

**Hazardous Decomposition Products**

Combustion products may include: Carbon oxides (CO, CO₂) nitrogen oxides (NO, NO₂) hydrocarbons and HCN

### SECTION 11: TOXICOLOGICAL INFORMATION

#### POTENTIAL ACUTE HEALTH EFFECTS

**Eye Contact**

Causes eye damage/irritation

**Skin Contact**

Causes skin irritation

**Inhalation**

May cause allergic respiratory reaction. May cause respiratory tract irritation. May cause lung damage.

**Ingestion**

Low oral toxicity, but ingestion may cause irritation of the gastrointestinal tract.

#### POTENTIAL CHRONIC HEALTH EFFECTS

**Sensitization**

May cause allergic skin reaction and allergic respiratory reaction.

**Carcinogenic Effects**

Suspected of causing cancer

**Mutagenic Effects**

No data available

**Developmental Effects**

Not expected to cause developmental effects

**Reproductive Effects**

Not expected to cause reproductive effects

### SECTION 12: ECOLOGICAL INFORMATION

**Ecotoxicological data**

No ecotoxicity data noted for the ingredients.

**Ecotoxicity**

Not expected to be harmful to aquatic organisms.

**Environmental effects**

The product is not classified as environmentally hazardous.

**Mobility in soil**

By considering the production and use of the substance, it is unlikely that significant environmental exposure in the air or water will arise. Immiscible with water but will react with water to produce inert and non-biodegradable solids. Conversion to soluble products, including diamino-diphenylmethane (MDA), is very low under the optimal laboratory conditions of good dispersion and low concentration. In air, the predominant degradation process is predicted to be a relatively rapid OH radical attack, by calculation and by analogy with related diisocyanates.

### SECTION 13: DISPOSAL INFORMATION

**Waste Disposal Method**

The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should always comply with the requirements of environmental protection and waste disposal legislation and any regional l
local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Empty Containers Disposal
Empty containers should be taken to an approved waste handling site for recycling or disposal.

SECTION 14: TRANSPORTATION INFORMATION

DOT OTHER REGULATED SUBSTANCES, LIQUID, N.O.S. (Methylene Diphenyl Disocyanate)

Land Transport TDG
Not regulated as dangerous good.

Sea Transport IMDG
Not regulated as dangerous good.

Air Transport IATA/ICAO
Not regulated as dangerous good.

SECTION 15: REGULATORY INFORMATION

WHMIS
WHMIS Class D-2A: Material causing other toxic effects (very toxic).
WHMIS Class D-2B: Material causing other toxic effects (toxic).

CEPA (DSL)
All components are listed or exempted.

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classification in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.
Liquid decontaminants (percentages by weight or volume)
Decontaminant 1: sodium carbonate: 5 – 10% - liquid detergent: 0.2 – 2% - Water: to make up to 100%
Decontaminant 2: concentrated ammonia solution: 3 – 8% - liquid detergent: 0.2% - 2% - Water: to make up to 100%
Decontaminant 1 reacts slower with diisocyanates but is more environmentally friendly than decontaminant 2.
Decontaminant 2 contains ammonia presents health hazards. (see supplier safety information).
