Technical Bulletin #126

Adhesion of Boreal Nature Elite to spray-applied cementitious thermal barriers

The adhesion of GENYK 'Boreal Elite' to several self-adhesive SBS Modified Bitumen Membranes has been determined to exceed the NRC 'Air Barrier System' Standard tested separation threshold of 16psi (110kPa).

MATERIALS THAT ARE GENYK COMPATIBLE—

1. W.R. GRACE – Monokote Z3306
2. AD FIRE PROTECTION SYSTEMS – A/D Thermal Barrier
3. CAFCO – TB415

The cementitious thermal barriers mentioned above have been tested and are deemed compatible with GENYK 'Boreal Elite' spray polyurethane foam.
